Sassy RED

Red lips make a statement and can be pulled off with any number of coloured outfits, but always look ravishing when paired with classic black. Whether you're suited up for the office or glammed up for a night out, a bold red lip is the perfect accessory for women in black. **Olivia** plays it up with **Ultra Color Lip Crayon in Cherry Picked**.

You can never go wrong with a charismatic red lipstick and a crisp white outfit.

Nudes and browns are perfect for days when you feel like dressing down, such as in jeans and a T-shirt. When choosing a nude lipstick, select one a shade lighter or darker than your natural complexion for best results.

Hot tip:

If you are highlighting your eyes with bold shadows, play down your lips with a nude or pale shade of lipstick.

ASSERTIVE *graceful* Nude & BROWN

A brown lipstick works like a neutral shade but commands attention like a red. Pair it with a green dress, like our street-style model Cathy, or try a latte-flavoured outfit – hot this spring. Cathy applied **Ultra Color Rich Lipstick in Mocha** which shows off her dazzling smile.

SOPHISTICATED glamorous Captivating CORAL

Corals have made a big comeback over the past few years, and it looks ravishing on most skin types. It may sound outlandish to combine a coral dress with a coral lip, but the results are sensational! **Brooke** shows how to pull off the double act with **Ultra Color Bold Lipstick Bright Nectar**.
